

TRANSFORMING THE ENTERPRISE WITH ARTIFICIAL INTELLIGENCE

Today, enterprises are struggling with business transformation. Customers seek deeper engagement. Regulators constantly introduce new rules. Shareholders remain fixated on the bottom line. Employees want better resources, scalable tools and improved insights to drive strategic change.

RAGE AI™ incorporates **deep linguistic parsing** and **proprietary linguistics-based** innovations to understand the real meaning of documents and interpret them as a human would.

RAGE AI™ is a no-code fully model driven platform built with the goal of bridging the gap between your business transformation idea and its realization by automating knowledge work, intuitively and rapidly.

The platform enables you to stay focused on solving your business problem without getting mired in incomprehensible technology details. Intelligent technologies that can perform knowledge work are expected to have a potential economic impact by 2025 of \$5.2 trillion to \$6.7 trillion.¹ And additional labor productivity could equal the output of 110 million to 140 million full-time workers.²

In fact, if the technologies that intelligently automate knowledge work and “understand” natural language were to reach the median level of human performance, it would redefine the way knowledge work is done in more radical ways than anything we have ever seen before.

RAGE AI™ incorporates deep linguistic parsing and proprietary linguistics-based innovations to understand the real meaning of documents and interpret them as a human would. With its traceable, deep learning technology, RAGE AI™ significantly extends the frontier of deep learning and machine intelligence from “natural language processing” to “natural language understanding.”

In just 30 to 90 days, you can be wielding the power of RAGE AI™. Many of the world’s leading companies trust RAGE Frameworks to gain a competitive edge faster than ever before.

RAGE Frameworks Artificial Intelligence makes your impossible, possible.
