

RAGE RTI™ FOR CAPITAL MARKETS

Introducing Rage RTI™

RAGE-AI™ is a **completely tractable / traceable solution**, where every piece of analysis can be traced back to the source document.

Business Problem

- Inability to identify alpha consistently through timely analysis of all the real time information at our disposal.
- Zero visibility into whether significant market signal are not being captured.

Solution

- RAGE-AI™ deep learning technology continuously monitors each security in its own operating context [company, industry, macro-economic and geo-political].
- RAGE RTI™ Intelligent Agents monitor global events on a 24x7 basis and assess their impact on these securities in real time, looking for both direct and indirect [2nd, 3rd, 4th order] impact and detecting signals.
- Built in machine learning, both autonomous and assisted.
- RAGE-AI™ provides fundamental models and forward looking credit ratings.

Benefits

- RAGE RTI™ demonstrated in 10 - 15% of stocks that it is a leading indicator of price movements.
- Continuous assessment and monitoring, 24x7.
- Consistent assessment. Elimination of any individual bias.
- RAGE-AI™ is a completely tractable / traceable solution, where every piece of analysis can be traced back to the source document.
